## International Congress «New Technologies of Gas and Oil Industry, Energy and Communication»

### About the Congress

The International Congress "New Technologies of Gas and Oil Industry, Energy and Communication" was established and annually held since 1991 as per the goals and objectives of the Academy identified in its Charter.

Traditionally, the congress is dedicated to the technologies of design and implementation of the largest international oil and gas projects, the program of gas resources development, the creation of gas processing and petrochemical complexes, the development of the helium industry, resource-saving technologies and equipment in the construction and operation of gas and oil supply systems, the use of innovative technologies in the fuel and energy complex.

Heads of regions of the Russian Federation, federal and regional departments, heads of the largest local and foreign oil and gas companies, conversion enterprises, companies involved to information systems and communications, technologists, builders, financiers, and energy are taking part in the work of the congress. The constant participants of the congress are subsidiaries of PJSC «Gazprom».

Conducted congresses have become a valid mechanism for international technological integration. The wide representation of the participants allows us to discuss with interest and with knowledge the transformation of the raw materials sectors of the economy into high-tech and competitive industries that ensure environmental safety and resource-saving.

## International Congress «New Technologies of Gas and Oil Industry, Energy and Communication»
